YEARS OF PRACTICE IN TUCSON? 4

WHY YOU CHOSE TO PRACTICE IN THE HEALTH

CARE FIELD: *Dr. Weyer* — “My desire to go into medicine was heavily influenced by my father, who also was a dermatologist. I witnessed how my father’s work positively impacted the lives of others. I am committed to excellence and am extremely passionate in caring for patients in my hometown.” *Dr. Moenster* — “I decided to go into the health care industry at the age of 10, after I suffered a sports injury. I saw physicians as incredible people who had the power to heal and improve one’s quality of life. I wanted to be in that position where every day of my life would be dedicated to making another human being feel whole again.”
